

Verification Report for

UCR ID No. 573

DESCRIPTION	DATA
Project Owner Name :	2.10 MW Wind Power Project activity by Knack Packaging Private Limited
Project Location :	District: Jamnagar
	Village: Moti Bhalsan
	Taluka: Jamnagar State: Gujarat
	Latitude: 22°32'94.58"N Longitude: 70°15'60.84"E
	India
Project Aggregator:	Green Shift Climate Solutions - Vapi 396 191
Scale of the project activity	Small Scale
Date	20 th Nov -2025

DESCRIPTION	DATA
	Limbaja Energy
	2 Shrijinagar, Arihantnagar Road,
	Nr. Aashapura cottages,
	Bhuj-Kachchh-370001
	M : 9714253756
	limbajaenergy@gmail.com
Verification Firm:	
	Mr. Jayprakash Jethi
	Mr. Tamizahmed Rayma

COVER PAGE

Project Verification Report Form (VR)

BASIC INFORMATION

Name of approved UCR Project Verifier / Reference No.	Limbaja Energy
Type of Accreditation	<input type="checkbox"/> CDM or other GHG <input type="checkbox"/> Accreditation ISO 14065 Accreditation <input checked="" type="checkbox"/> UCR Approved
Approved UCR Scopes and GHG Sectoral scopes for Project Verification	01 Energy industries (Renewable/Non-renewable sources)
Validity of UCR approval of Verifier	Aug-2022 onwards
Completion date of this VR	20 th Nov 2025
Title of the project activity	2.10 MW Wind Power Project activity by Knack Packaging Private Limited
Project reference no. (as provided by UCR Program)	573

Name of Entity requesting verification service (can be Project Owners themselves or any Entity having authorization of Project Owners, example aggregator.)	Green Shift Climate Solutions Akhand Anand avenue, Anand Nagar, charwda road, Vapi 396 191
Contact details of the representative of the Entity, requesting verification service (Focal Point assigned for all communications)	Green Shift Climate Solutions Mobile: 8735000438 greenshiftclimatesolutions@gmail.com
Country where project is located	India
Applied methodologies (approved methodologies by UCR Standard used)	AMS-I.D.: "Grid connected renewable electricity generation version-18"
Project Verification Criteria: Mandatory requirements to be assessed	<input checked="" type="checkbox"/> UCR Standard <input checked="" type="checkbox"/> Applicable Approved Methodology <input type="checkbox"/> Applicable Legal requirements /rules of host country <input checked="" type="checkbox"/> Eligibility of the Project Type <input checked="" type="checkbox"/> Start date of the Project activity <input checked="" type="checkbox"/> Meet applicability conditions in the applied methodology <input checked="" type="checkbox"/> Credible Baseline <input checked="" type="checkbox"/> Do No Harm Test <input checked="" type="checkbox"/> Emission Reduction calculations

Jayprakash Jethi

Energy Auditor

+ 91 97142 53756

	<input checked="" type="checkbox"/> Monitoring Report <input checked="" type="checkbox"/> No GHG Double Counting <input type="checkbox"/> Others (please mention below)
Project Verification Criteria: Optional requirements to be assessed	<input checked="" type="checkbox"/> Environmental Safeguards Standard and do-no-harm criteria <input type="checkbox"/> Social Safeguards Standard do-no-harm criteria
Project Verifier's Confirmation: The <i>UCR Project Verifier</i> has verified the UCR project activity and therefore confirms the following:	The UCR Project Verifier Limbaja Energy certifies the following with respect to the UCR Project Activity " 2.10 MW Wind Power Project activity by Knack Packaging Private Limited " <input checked="" type="checkbox"/> The Project Owner has correctly described the Project Activity in the Project Concept Note (dated 15 th Oct 2025) including the applicability of the approved methodology AMS-I.D.: Grid connected renewable electricity generation version-18 & UCR Standard for Emission Factor and meets the methodology

Jayprakash Jethi
Energy Auditor
+91 97142 53756

	<p>applicability conditions and has achieved the estimated GHG emission reductions, complies with the monitoring methodology and has calculated emission reductions estimates correctly and conservatively.</p> <p><input checked="" type="checkbox"/> The Project Activity is likely to generate GHG emission reductions amounting to the estimated [4,591] TCO_{2e}, as indicated in the PCN, which are additional to the reductions that are likely to occur in absence of the Project Activity and complies with all applicable UCR rules, including ISO 14064-2 and ISO 14064-3.</p> <p><input checked="" type="checkbox"/> The Project Activity is not likely to cause any net-harm to the environment and/or society</p> <p><input checked="" type="checkbox"/> The Project Activity complies with all the applicable UCR rules¹ and therefore recommends UCR Program to register the Project</p>

PROJECT VERIFICATION REPORT

A. Executive Summary

The verification work has been contracted by project aggregator Impel Enterprise to perform an independent verification of its UCR project titled "**2.10 MW Wind Power Project activity by Knack Packaging Private Limited**" UCR approved project ID:573, to establish number of CoUs generated by project over the crediting period from 01/01/2024 to 31/12/2024 (both days included).

Verification for the period: 01/01/2024 to 31/12/2024

In my opinion, the total GHG emission reductions over the crediting / verification period stated in the Monitoring Report (MR), submitted to me is found to be correct and in line with the UCR guidelines.

The GHG emission reductions were calculated on the basis of **AMS-I.D.: Grid connected renewable electricity generation version-18 & UCR Standard for Emission Factor**

The verification was done remotely by way of video calls, phone calls and submission of documents for verification through emails as per UCR guidelines.

I am able to certify that the emission reductions from the **2.10 MW Wind Power Project activity by Knack Packaging Private Limited** (UCR ID – 573) for the period 01/01/2024 to 31/12/2024 amounts to 4,591 CoUs (4,591 tCO2e).

A.1 Scope of Verification

The scope of the verification is the independent, objective review and ex-post determination of the monitored reductions in GHG emission by the project activity.

- 1) The quality of data management and records of underlying data;
- 2) Completeness and accuracy of calculations and baseline emission reports;
- 3) Proper inclusion and documentation of all project locations,
- 4) Correct application of offset rules for filling Baseline Period data gaps;
- 5) Other data, methods and procedures deemed necessary to establish the accuracy of emission reductions.
- 6) Agreement stating Assurance to avoid double accounting for the project to be verified, along with required proof.

The project is assessed against the requirements of the UCR programme verification Guidance Document, UCR Standard, UCR Programme Manual and related rules and guidelines. Due professional care has been exercised and ethical conduct has been followed by the assessment team during the verification process. The verification report is a fair presentation of the verification activity. The validation of project is not part of present assignment and projects deemed validated post registration by UCR.

A.2 Description of the Project

As described in the Project Concept Note (PCN), the project activity involves Wind Power project of installed aggregated capacity of 2.10 MW Wind Power Project activity by Knack Packaging Private Limited at District: Jamnagar Village: Moti Bhalsan Taluka: Jamnagar State: Gujarat The geographic co-ordinate of the project locations is 22°32'94.58"N 70°15'60.84"E Country: India

The details of the project activity are verified with the project report copy submitted for verification.

As mentioned in the Monitoring Report and Emission Reduction Calculation sheet submitted for the verification, this project activity involves generation of grid connected electricity from the construction and operation of a new Wind power-based project for selling it to National and Regional grid. The project activity has installed capacity of 2.1 MW which will qualify for a Small-scale project activity under Type-I of the small - Scale methodology. The project status is corresponding to the methodology **AMS-I.D.:** Grid connected renewable electricity generation version-18.

Verified total emission reductions achieved through the project activity during the monitoring period is summarised below:

Summary of the Project Activity	
Start date of this Monitoring Period	01/01/2024
Carbon credits claimed up to	31/12/2024
Total Carbon Credit (tCO2eq)	4,591
Project Emission	0
Leakage Emission	0

B. Project Verification team, technical reviewer and approver

SN	Role	Last name	First name	Affiliation	Involvement in		
					Document review	Off-Site inspection	Interviews
1	Lead Verifier and Energy Auditor	Jethi	Jayprakash	Limbaja Energy (UCR authorised)	Yes	No	Yes
2	Energy Analyst and Verifier	Rayma	Tamizahmed	Limbaja Energy	Yes	No	No

C. Means of Project Verification

C.1 Desk/document review

The project documents submitted to UCR approved verifier Limbaja Energy was reviewed and validated by the lead verifier. The documents reviewed includes verification of legal status of individual project owner for consistency, project related documents like installation and commissioning of equipment used in project activity, monitoring related parameters including measuring instruments and their calibration records for the crediting period etc.

The PCN is made available to verifier post approval by UCR which is considered as validated documents and the content of validated PCN are considered as record wherever required. Further the communication agreement made between project owner and project aggregator is document of UCR registry hence the project aggregator is treated as authorized representative of project owner. All the documents submitted by project aggregator to verifier is treated as documents submission on behalf of project owner.

The list of submitted document is available in subsequent section of this verification report under section “Document reviewed or referenced”.

C.2 Off-site inspection: Not Applicable

Date of off site inspection: DD/MM/YYYY to DD/MM/YYYY

No.	Activity performed Off-Site	Site location	Date
1.			
...			

C.3 Interviews

No.	Interview			Date	Subject

D Project Finding

D.1 Identification and eligibility of project type

SN	Particular	Remarks
1	Means of Project Verification	This Project is taken reference of CDM Methodology AMS-I.D.: “Grid connected renewable electricity” Version 18.0 Ground Mounted Wind Projects.
2	Findings	<ul style="list-style-type: none"> 1) Project activity is described through UCR approved PCN. 2) UCR project communication agreement clearly defines the Project Proponent and Project Aggregator.
3	Conclusion	<p>The UCR approved format is used for description and project meets the requirement of UCR verification standard and UCR project standard. UCR project communication agreement submitted to verifier and the same has been verified. Methodology referenced and applied appropriately describing the project type. The eligibility of project aggregator is verified using UCR communication agreement, Project correctly applies the verification standard, UCR project standard and UCR regulations.</p> <p>The project activity is overall meeting the requirements of UCR Verification standard and UCR project standard.</p>

D.2 General description of project activity

SN	Particular	Remarks
1	Means of Project Verification	The project activity involves the setting up of a Wind Project. The commissioning certificate is referred. The project capacity was verified through purchase order invoice. The power evacuation at the Substation is confirmed by electricity generation sheet.
2	Findings	<ul style="list-style-type: none"> 1. Project Commissioning date is mentioned in the commissioning certificate. 2. Ground Mounted Wind Power Capacity is same as mentioned technical specifications. 3. Project implementation and sale of energy abide the Power Purchase Agreement.
3	Conclusion	The description of the project activity is verified to be true based on the review of PCN, MR, Commissioning Certificate, Purchase Order Copies and Technical Specification sheet.

D.3 Application and selection of methodologies and standardized baselines

D.3.1 Application of methodology and standardized baselines

SN	Particular	Remarks
1	Means of Project Verification	This Project is taken reference of CDM Methodology AMS-I.D.: “Grid connected renewable electricity” Version 18.0. For the applicability mentioned in the PCN and MR, Commissioning certificate, Detailed Project Report and PPA documents were referred.
2	Findings	The methodology applied is applicable for the project activity.
3	Conclusion	Methodology application is appropriate meeting the requirements of UCR and its standardized baseline. The methodology version is correct and valid. Referenced methodology is applicable to project activity.

D.3.2 Clarification on applicability of methodology, tool and/or standardized baseline

SN	Particular	Remarks
1	Means of Project Verification	The documents reviewed CDM Methodology AMS-I.D.: “Grid connected renewable electricity” Version 18.0. UCR Program standard, and UCR Verification Standard.
2	Findings	Emission factor calculated using the methodology is higher than UCR standard recommends.
3	Conclusion	The emission factor considered for the calculation of the emission reductions is verified with the UCR Program Standard. The total installed electrical energy generation capacity of the project equipment does not exceed 15 MW thus meeting the requirement of small-scale project.

D.3.3 Project boundary, sources and GHGs

SN	Particular	Remarks
1	Means of Project Verification	Project boundary is in line with the applied methodology, and the sources of GHGs etc.
2	Findings	Nil
3	Conclusion	Project boundary is in line with the applied methodology.

D.3.4 Baseline scenario

SN	Particular	Remarks
1	Means of Project Verification	PCN Section B.5 and General Project Eligibility Criteria and Guidance, UCR Standard.
2	Findings	Declared information is correct and verified.
3	Conclusion	Baseline scenario is appropriately described. The conservative value for emission considered. The baseline scenario is in accordance with UCR project verification standard and UCR project standard.

D.3.5 Estimation of emission reductions or net anthropogenic removal

SN	Particular	Remarks
1	Means of Project Verification	Export Meter Reading Reports, and General Project Eligibility Criteria and Guidance, UCR Standard
2	Findings	None
3	Conclusion	Emission reductions are correctly calculated. The instruments are calibrated and hence the emission reduction is reported correctly and meets the requirements of UCR verification standard and UCR project standard.

D.3.6 Monitoring Report

SN	Particular	Remarks						
1	Means of Project Verification	Meter Calibration reports, Export Meter Reading Reports, and General Project Eligibility Criteria and Guidance, UCR Standard,						
2	Findings	None						
3	Conclusion	<p>Meter testing reports are provided Meter details are mentioned below.</p> <p>Energy meters installed at the site:</p> <p>Main Meter: Agarwal Road Line</p> <table border="1" style="width: 100%; border-collapse: collapse;"> <tr> <td style="width: 50%; padding: 5px;">Make</td> <td style="width: 50%; padding: 5px;">Secure</td> </tr> <tr> <td style="padding: 5px;">Serial No.</td> <td style="padding: 5px;">GJ7591B</td> </tr> <tr> <td style="padding: 5px;">Calibration Date</td> <td style="padding: 5px;">15-Sep-23</td> </tr> </table>	Make	Secure	Serial No.	GJ7591B	Calibration Date	15-Sep-23
Make	Secure							
Serial No.	GJ7591B							
Calibration Date	15-Sep-23							

As per Central Electricity Authority (Installation and Operation of Meters) (Amendment) Regulations, 2019 clause 14 (i)-b “All Interface Meters shall be tested on-site using accredited test laboratory for routine accuracy testing at least once in five years and recalibrated if required.

The Calibration reports are verified with available serial number of meters. The errors are within permissible limits.

Monitoring parameter as reported through MR adequately represents the parameters relevant to emission reduction calculation. The number of CoUs generation is calculated based on this accurately reported data. The calculation was done using excel sheet where all the parameters reported. The emission factor for electricity is as per UCR standard for. Monitoring and emission reduction calculations are correctly calculated and reported. The monitoring report meets the requirements of UCR project verification requirements

D.4 Start date, crediting period and duration

SN	Particular	Remarks
1	Means of Project Verification	PCN and MR, Commissioning certificate, Detailed Project Report and PPA documents were referred.
2	Findings	None
3	Conclusion	The start date, crediting period and project duration reported correctly and this meets the requirements of UCR verification standard and UCR project standard.

D.5 Positive Environmental impacts

SN	Particular	Remarks
1	Means of Project Verification	PCN
2	Findings	Declared information is correct and verified.
3	Conclusion	The positive environmental impact meets the requirement of UCR verification standard and UCR project standard

D.6 Project Owner- Identification and communication

SN	Particular	Remarks
1	Means of Project Verification	PCN, Communication Agreement, MR, Commissioning certificate, Power Purchase Agreement.
2	Findings	Declared information is correct and verified.
3	Conclusion	Project owner identified through communication agreement signed between PP and PA. Equipment purchase order and commission verified. Also, legal document like Power Purchase Agreement clearly establishes the project owner. The identification and communication correctly meet the requirement of project verification and UCR project standard.

D.7 Positive Social Impact

SN	Particular	Remarks
1	Means of Project Verification	Project has provided temporary employment to local people during its installation and commissioning. Also post commissioning some of people have employed permanently and local people were engaged leading to social financial benefit to surrounding. Overall social impact of project implementation is positive on the surrounding area.
2	Findings	None
3	Conclusion	Project has overall positive social impact.

D.8 Sustainable development aspects (if any)

SN	Particular	Remarks
1	Means of Project Verification	Not Applicable
2	Findings	None
3	Conclusion	-

E. Internal quality control:

- Due professional care has been taken while reviewing the submitted document.
- There is no conflict of interest as the verifier has no other engagement with either aggregator or project owner directly or indirectly.
- Verification team consists of experience personnel.
- Technical review is performed by experienced and independent person

F. Project Verification Opinion

Considering the above-mentioned verification conducted on the basis of UCR Protocol, which draws reference from UCR Protocol Standard Baseline, CDM UNFCCC Methodology AMS-I.D.: Grid connected renewable electricity generation version-18 & UCR Standard for Emission Factor and the documents submitted during the verification including the data, Project Concept Note (PCN) / Monitoring Report (MR), I am able to certify that the emission reductions from the 2.10 MW Wind Power Project activity by Knack Packaging Private Limited (UCR ID – 573) for the period 01/01/2024 to 31/12/2024 amounts to 4,591 CoUs (4,591 tCO2e).

CERTIFICATE OF COMMISSIONING

This is to certify that M/s Knack Packaging Private Limited, 330/A, Third Floor, Kalasagar Mall, Opp. Saibaba Temple, Near Sattadhar Cross Road, Ghatlodiya, Ahmedabad - 380061, has commissioned **2.10 MW** capacity wind farm consisting of **1 (One)** number of new wind turbine generator as per the WTG ID no., location and date of commissioning given below:

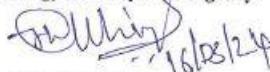

Make of each Wind Turbine Generator (WTG)						M/S Suzlon Energy Limited	
Capacity of each Wind Turbine Generator						2100 kW	
No. of Wind Turbine Generator/s						1 No. (One)	
Total capacity of the Wind farm						2.10 MW	
Details of Site Installation						Location No.	WTG ID No.
Sr. No.	Village	Taluka	District	Survey No.	Type of Land		
01	Moti Bhalsan	Jamnagar	Jamnagar	270/I	Govt.	NMT061	KPPL/SEL/2100/23-24/7072

The wind farm is connected to 33/66kV Wind Farm site sub-station at Village: Chandraga by 33kV grid line. The Chandraga Wind Farm site sub-station is connected to 220 kV GETCO Jamnagar Sub Station.

Sub: Assurance to avoid double counting by Project Owners:

Dear Sir,

- I declare the following given below:
- I, Alpesh Tulsibhai Patel, on behalf of Knack Packaging Limited, with details as provided in, incorporated in India, having registered office at 330/A, 3rd Fl&or, Kalasagar Mall, Opposite Saibaba Temple, Near Sattadhar Cross Road, Ghatlodiya, Ahmedabad. 380 061;
- The parties identified above, herewith confirm that:

We Jointly intend to submit/have submitted the project 2.10 MW Wind Power Project activity by Knack Packaging Limited (UCR Project ID : 573) for registration with UCR Program which aims for issuance of CoUs (called as Carbon Offset Units) consequent to compliance with all the applicable requirements of UCR Program.

Authorised Actions. Sonia Bhatt is authorised to act for the Project Proponent with respect to state the following:

- The project is not registered more than once with the UCR program
- The project is not registered under any other GHG program (voluntary or compliance)
- Double counting with mandatory domestic targets is avoided and that host country will not use the project's emission reductions to track progress towards, or for demonstrating achievement of its nationally determined contributions (NDCs).
